SWISS INSTRUMENTS^{PM}

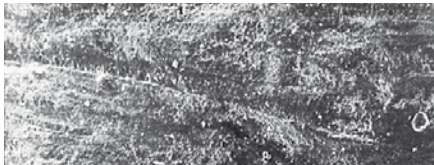

INSTRUMENT A

- > Universal instrument for removing supragingival deposits in all quadrants

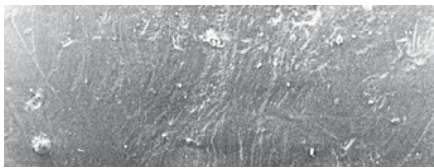

INSTRUMENT PS

- > Special instrument for gentle and painless subgingival scaling, cleaning and disinfection of periodontal pockets

Treated by instrument X

Treated by EMS Piezon® technology and Swiss Instruments^{PM}

BEWARE OF COPY TIPS

- > Only the Original Swiss Instruments^{PM} show the EMS laser engraving and are delivered with a CombiTorque®
- > Original Swiss Instruments^{PM} are made of a specific EMS stainless steel alloy that allows optimum efficiency in combination with the Original Piezon® handpiece and the Original Piezon® scaler
- > Copy Tips may damage the handpiece thread, break easily and have a rough surface – a risk for the patient

Photography of tooth surface: Center for Dental and Oral Medicine, University of Hamburg, Germany

COMBITORQUE®

- > Unique combination of torque wrench and instrument holder for sterile mounting of the instrument

STERIBOX

- > Fully sterilizable stainless steel steribox, ¼ or ½ DIN size, depending on the number of handpieces and instruments
